Harrison Kinsley
Harrison@pythonprogramming.net

Word Count: 41532 (tools)

Links to the chapters:

Chapter 1 - Introducing Neural Networks
Chapter 2 - Coding Our First Neurons
Chapter 3 - Adding Layers
Chapter 4 - Activation Functions
Chapter 5 - Loss
Chapter 6 - Optimization
Chapter 7 - Derivatives
Chapter 8 - Gradients, Partial Derivatives, and the Chain Rule
Chapter 9 - Backpropagation
Chapter 10 - Optimizers
Chapter 11 - Testing Data
Chapter 12 - Validation Data
Chapter 13 - Training Dataset
Chapter 14 - L1 and L2 Regularization
Chapter 15 - Dropout
Chapter 16 - Binary Logistic Regression
Chapter 17 - Regression
Chapter 18 - Model Object
Chapter 19 - A Real Dataset
Chapter 20 - Model Evaluation
Chapter 21 - Saving and Loading Model Information
Chapter 22 - Model Predicting/Inference
